The figure displays four plots arranged in a 2x4 grid, illustrating the evolution of a network's size over time. The top row shows a network starting with 1 node and growing to 10,000 nodes, while the bottom row shows a network starting with 10,000 nodes and shrinking to 1 node. Each plot has a logarithmic y-axis for the number of nodes and a linear x-axis for time steps.

- Top Left Plot:** The y-axis ranges from 1.00 to 10.00. The x-axis ranges from 0 to 10. The network size grows from 1 to approximately 10 over 10 time steps.
- Top Right Plot:** The y-axis ranges from 1 to 10,000. The x-axis ranges from 0 to 10. The network size grows from 1 to 10,000 over 10 time steps.
- Bottom Left Plot:** The y-axis ranges from 10% to 1%. The x-axis ranges from 0 to 10. The network size decreases from 10,000 to approximately 10 over 10 time steps.
- Bottom Right Plot:** The y-axis ranges from 10,000 to 1.00. The x-axis ranges from 0 to 10. The network size decreases from 10,000 to 1 over 10 time steps.
